DESCRIPTIVE HANDOUT**

RECORD GROUP 443: RECORDS OF THE NATIONAL INSTITUTES OF HEALTH

• **National Collaborative Perinatal Project, 1959-1974**

The National Collaborative Perinatal Project (NCP), 1959-1974, in the Records of the National Institutes of Health (NIH, Record Group 443) consists of the Master File, a Variables File, and 30 special topic Work Files. The study was conducted by NIH's National Institute of Neurological Diseases and Stroke. A list of the available NCP data files is available in the Center for Electronic Records Title List of Holdings under [Record Group 443](#). NARA's holdings of National Institutes of Health records, in all media, are described in the *Guide to Federal Records in the National Archives of the United States* under [Record Group 443](#).

The NCP data constitute an important resource for biomedical and behavioral research in many areas of obstetrics, perinatology, pediatrics, and developmental psychology. The data also provide a prospective base for examining neurological and neurosensory defects and the relationship of pregnancy and perinatal factors on the health of individual children. The major categories of data collected include obstetrical, pediatric, pathological, serological, socioeconomic and family, genetic history, psychological, speech, language, and hearing. The mother was examined during pregnancy, labor, and delivery. The children were given neonatal examinations and follow-up examinations at four, eight, and twelve months, and three, four, seven, and eight years.

Supplemental information was gathered throughout the study, including family linkages between related women participating in the NCP. There are 6,700 data items on the approximately 58,000 study pregnancies. Further information about the history of the study and some of the preliminary results may be found in *The Collaborative Perinatal Study of the National Institute of Neurological Diseases and Stroke: The Women and Their Pregnancies* (U.S Department of Health Education and Welfare, Public Health Service, National Institutes of Health, 1972, DHEW Publication No. (NIH) 73-379).

Documentation is voluminous and is available on 75 microfiche. For more information, please contact Reference Services, Center for Electronic Records, The National Archives at College Park, 8601 Adelphi Road, College Park, MD 20740-6001. The Center's reference number is (301) 713-6645 and electronic mail address is cer@nara.gov.

June 28, 2001

This note relates to your order (NWME Order 2001-072) for 32 files relating to the Collaborative Perinatal Project, 1958-1974. As requested, the files are written in ASCII record delimited format.

The label information on the CD-Rs has the name of the first file and the volume serial number of the CD-R. The enclosed directories give the file names and byte count of each file. Also enclosed are printouts (dumps) of a sample of the data included on each CD-R.

Listed below are the names of the datasets included on the CD-R_1:

REFERENCE SERVICES (NWMB)
CENTER FOR ELECTRONIC RECORDS
(301) 713-6645

We enclose the copy of electronic records you ordered.
Please note:

1. Requestors are fully responsible for providing correct, written identification of the electronic records they are ordering. Likewise, requestors are fully responsible for supplying accurate written information regarding the technical specifications for their copy or copies of the electronic records at the time they send their order.
2. The Center for Electronic Records guarantees that any copy of an electronic record or records provided to fill reproduction orders are an exact copy or copies of the records as received from the agency of creation, unless otherwise documented. National Archives staff do not verify the completeness nor accuracy of any of the records transferred to the National Archives. Thus responsibility for the content of the records rests with the agency which created the records or which transferred the records.

3. All copies of electronic records are shipped on certified 9-track tape reels, on certified 3480-class 18-track tape cartridges, or on CD-Rs in accord with the written technical specifications provided with the order. Readability of the records is guaranteed for 90 days from the date of shipment. Within the 90-day period, any faulty tape, cartridge, or CD-R copy will be replaced at no cost to the user. The user should return the faulty tape, cartridge, or CD-R to the Center for Electronic Records with a copy of the output that indicates the problem.

We ask that recipients review their shipment upon receipt to check that all missing items listed on the packing slip have been received. Please report any tapes, cartridges, or CD-Rs as soon as possible so that any potential problems are discovered within the warranty period described above.

In order to serve the public better, we ask users of records from the Center for Electronic Records to send us any suggestions for improvement of our services.

REFERENCE SERVICES (NWME)
CENTER FOR ELECTRONIC RECORDS
(301) 713-6645

We enclose the copy of electronic records you ordered.

Please note:

1. Requestors are fully responsible for providing correct, written identification of the electronic records they are ordering. Likewise, requestors are fully responsible for supplying accurate written information regarding the technical specifications for their copy or copies of the electronic records at the time they send their order.
2. The Center for Electronic Records guarantees that any copy of an electronic record or records provided to fill reproduction orders are an exact copy or copies of the records as received from the agency of creation, unless otherwise documented. National Archives staff do not verify the completeness nor accuracy of the content of any of the records transferred to the National Archives. Thus responsibility for the content of the records rests with the agency which created the records or which transferred the records.
3. All copies of electronic records are shipped on certified 9-track tape reels, on certified 3480-class 18-track tape cartridges, or on CD-Rs in accord with the written technical specifications provided with the order. Readability of the records is guaranteed for 90 days from the date of shipment. Within the 90-day period, any faulty tape, cartridge, or CD-R copy will be replaced at no cost to the user. The user should return the faulty tape, cartridge, or CD-R to the Center for Electronic Records with a copy of the output that indicates the problem.

We ask that recipients review their shipment upon receipt to check that all the items listed on the packing slip have been received. Please report any missing items immediately. Further, recipients should attempt to read their tapes, cartridges, or CD-Rs as soon as possible so that any potential problems are discovered within the warranty period described above.

In order to serve the public better, we ask users of records from the Center for Electronic Records to send us any suggestions for improvement of our services.
